Exterior Stairways

Interpretations of State and Local Building Codes
1998 California Building Code: Chapter 10
Revision Date: July 1999

Page 1 of 1

I. Definition

An exterior stairway is a stairway entirely open on two adjacent sides, except for required columns and open-type handrails. The adjoining open areas shall be either yards, courts or public ways; the other two sides may be enclosed by the exterior walls of the building.

II. Permissible Roofing

A roof large enough to cover only the stairway (in plan) may be constructed over the exterior stairway, except that eaves projecting a maximum of two feet will be permitted.
